

# FISHCOLL BIO

Isinglass of Organic origin

## TECHNICAL CHARACTERISTICS

**FISHCOLL BIO** is a proteinic fining agent based on isinglass that has been obtained from **raw materials of Organic origin**. **FISHCOLL BIO** possesses a high Bloom grade, it can be easily dissolved in lukewarm water and it can be used in production of **quality Organic wines**.

**FISHCOLL BIO**, furthermore, is an Allergens Free proteinic fining agent, according to prescriptions set by Directives CE 89/2003, 77/2004, 63/2005.

## APPLICATIONS

**FISHCOLL BIO** is an excellent **fining agent for Quality Organic Wines**, either white, pink or red.

Fining with **FISHCOLL BIO** allows for:

- ⇒ Better limpidity
- ⇒ Better filterability
- ⇒ Respect for the aromatic characteristics

**FISHCOLL BIO** is a fining agent in conformity with the regulations guiding the production of Organic wines, is Allergen Free, acts already at low dosage and it may be conveniently used along the entire production cycle, from juices clarification up to wines stabilization.

## DOSAGE AND INSTRUCTIONS FOR USE

Dissolve **FISHCOLL BIO** in 10-20 volumes of lukewarm water. Add the solution to the mass and carefully homogenize into it.

Dosage: from 0,5 to 2 g/hl in white and pink wines; up to 4-5 g/hl in red wines.

## COMPOSITION

**Organic** isinglass.
